This term in the Music Room, we will continue to develop knowledge and skills that will include different aspects of rhythm, pitch, dynamics (louids and softs), form (echo, binary), timbre (combination of sounds) and texture (layers of sound).

We will be imitating pitch and rhythm patterns using voices, instruments and body percussion.

Students will be practicing playing instruments including recorder, xylophone, bells, keyboards and percussion instruments. We will be enjoying music AND movement!

The Juniors and Seniors will be looking at the C Pentatonic scale which then leads into listening to different culture music as the pentatonic scale can be heard in music from China, Africa, South America, Indonesia and some British folk songs.

We will look at note values and terminology used in music to indicate tempo (speed) and dynamics (louids and softs).

It will be a wonderful term!

Mrs Cherie Broadhurst
